Integrated Solution for Production Line

Engineering Service for 2-PC Can Making

Engineering Service for 2-PC Can Making

SLAC provides turnkey 2-pc can production line based on specific requirements from different customers. SLAC service includes:

1. Layout and design

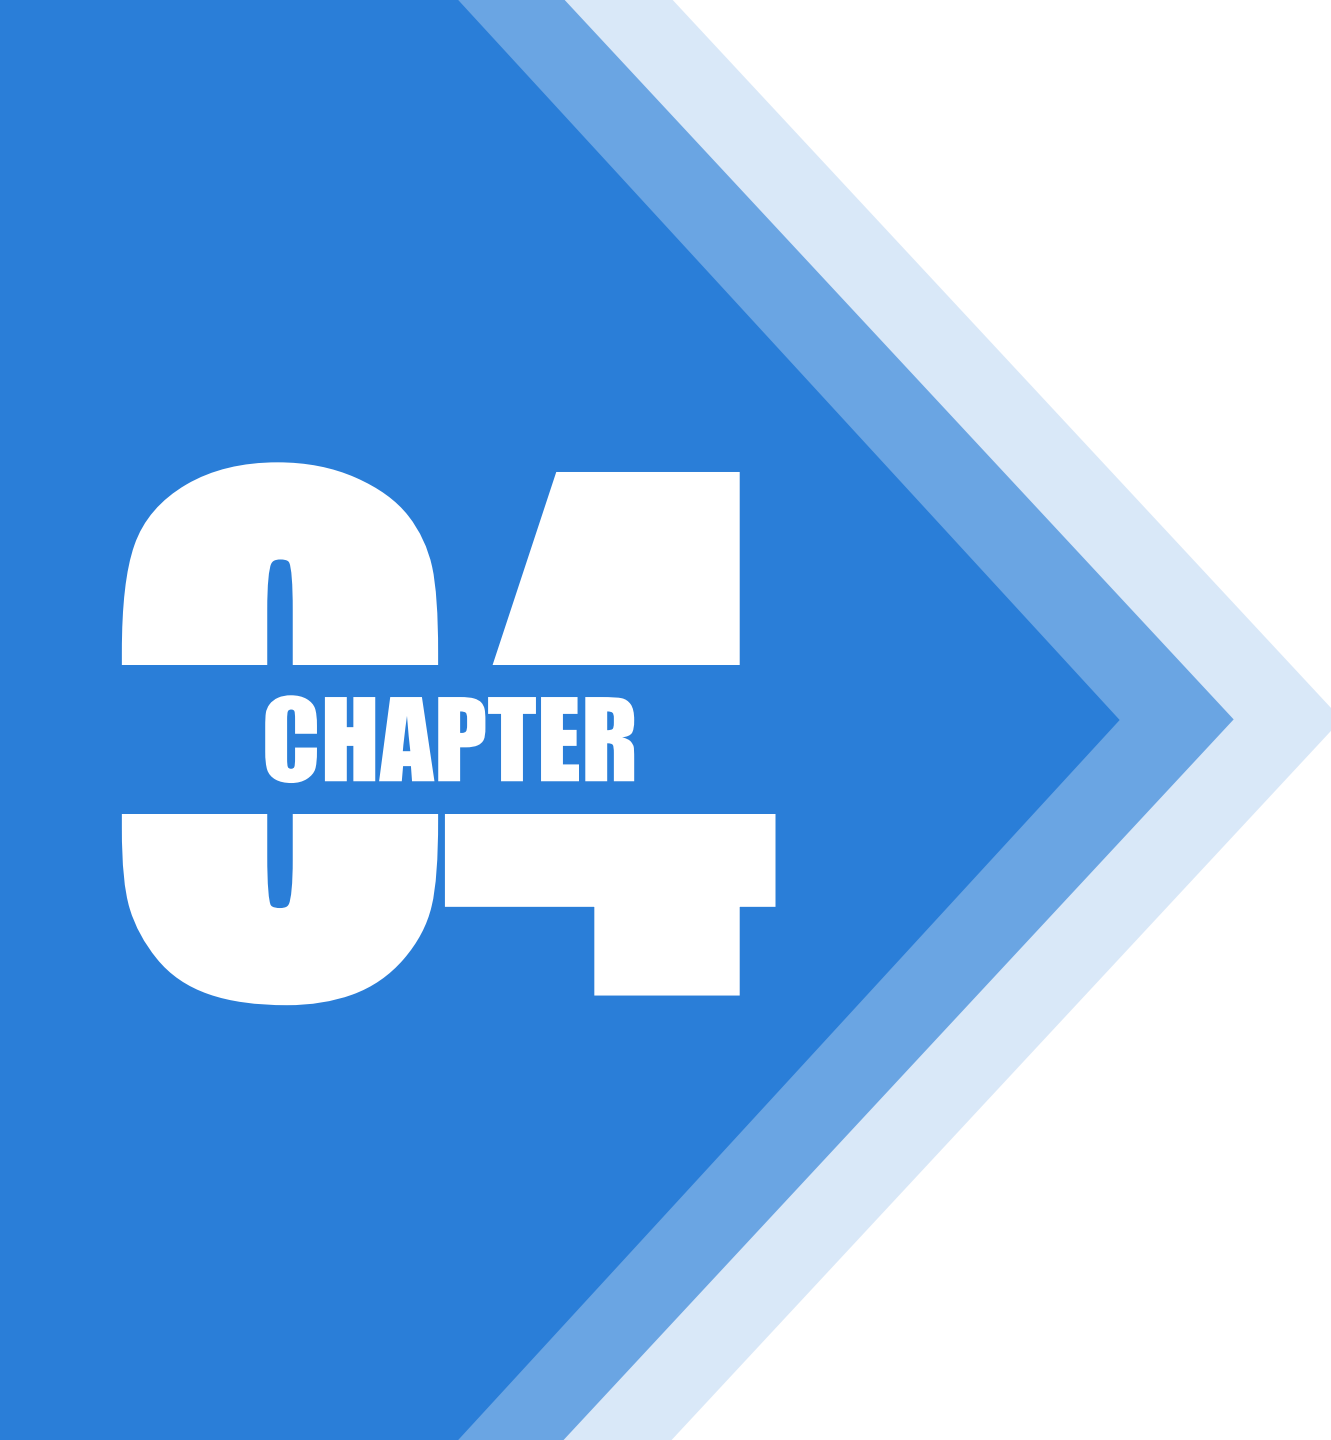

- Plant layout and processing equipment
- Selection on main production equipment and auxiliary equipment
- Piping and steel structures
- Power distribution, lighting, ventilation
- Conveyors and line controls

2. Installation

- Main equipment, auxiliary equipment, conveyors
- Piping and steel structures
- Power distribution and line controls

3. Start-up

- Experts on site for installation and debugging
- Training to customer employees

Acquiring Corima International Machinery in Italy

Thanks to over 20 years experience in the metal packaging industry, today Corima offers a wide range of can making technologies.

Acquiring Corima International Machinery in Italy

Corima International Machinery S.r.l.

Thanks to over 20 years experience in the packaging industry, today CORIMA offers a wide range of can-making technologies.

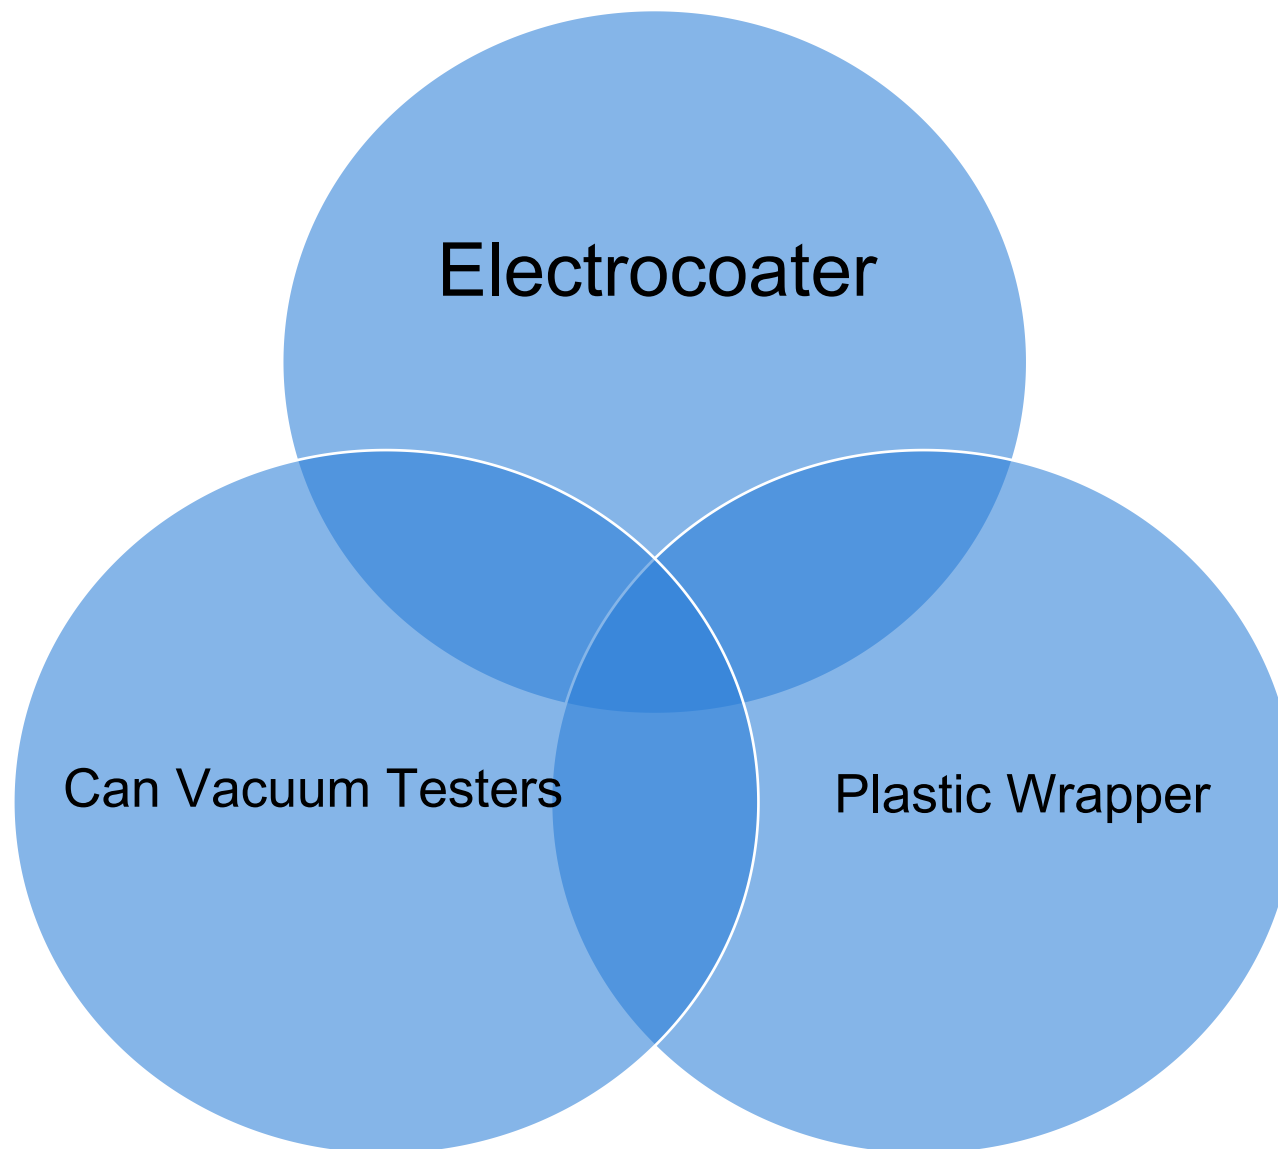

Research and development into new solutions for optimization of the cost and performance of its products, has led the way to the company becoming an established player in the international market.

The machines are designed and manufactured in the plant in Vigarano Pieve (Italy), in an ongoing process of cooperation between the engineering department, production personnel and the customer that enables consistent product development during the manufacturing process.

In order to satisfy various demands, CORIMA also offers a wide range of second hand machinery either under the “as is” formula or completely refurbished, according to customer needs.

Our personnel, with years of experience behind them, are at the customer's disposal for on-site technical assistance from the installation phase to commissioning.

Enriching our Products

Electrocoating Technology

ELECTROCOATER

Compact Electrocoater

Description:

The new design of our machines meets and beats all other types of machines offered on the market. We also achieved better performances giving more immersion time, checking the process end by end, reducing bath foaming and solution waste, reducing cleaning and maintenance downtimes. The total accessibility of any parts makes this machine "user-friendly" for the operator.

END DIMENSION:

ø 52mm (200) to 155mm (603) and Hansa, also other sizes could be taken into consideration.

INFEED LANES:

1 or 2

OUTPUT:

up to 600 e.p.m. per line

NATURAL GAS CONSUMPTION:

10-15Nm³/h (average for 2-lane machine)

WATER INFEED:

400 l/h (can be reused)
(average for 2-lane machine)

AIR CONSUMPTION:

600 nm²/h at 6 bar (average for 2-lane machine)

ELECTRICAL REQUIREMENTS:

20 Kw, 380 V, 50/60 Hz, 3-phase .
(easily adaptable to other standard)

ADVANTAGES

Can Vacuum Testers

Automatic Plastic Wrapper

High-Quality Service for Canmakers in Europe

SLAC now have technology and service center in Europe due to acquiring Corima in Italy, and we will provide high-quality service for customers in Europe.
